

CONTENTS

	<i>List of Figures and Tables</i>	xiii
	<i>Preface</i>	xxi
	<i>Acknowledgments</i>	xxv
	<i>Foreword by Franco Modigliani</i>	xxix
PART I	GENERAL OVERVIEW	
Chapter 1	Managing Investment Funds Efficiently	3
	<i>Arun S. Muralidhar</i>	
	Overview	3
	Governance and Organization Structure	5
	Setting Appropriate Investment and Funding Policy	10
	Efficient Implementation of Investment Policies	16
	Monitoring Performance and Risks of Investment Decisions	19
	Other Implementation Issues	21
	Summary	23
	Appendix 1.1—Central Bank Reserves Management— A Similar Perspective	24
	Notes	26
Chapter 2	The Similarities of Defined Benefit and Defined Contribution Schemes	27
	<i>Arun S. Muralidhar</i>	
	Overview	27

	Issues Concerning Pension Plans	29
	Investment Policy Process for DB and DC Schemes	33
	Summary	38
	Notes	40
PART II	THE IMPORTANCE OF ASSET-LIABILITY MANAGEMENT: THREE CASE STUDIES	
Chapter 3	An Asset-Liability Analysis with Implications for Setting Objectives	43
	<i>Arun S. Muralidhar</i>	
	Overview	43
	Background on Types of Plans	44
	Risks	45
	Objectives, Risk Measures, and Risk Tolerance	46
	Investment and Funding Strategies	51
	Asset Classes, Returns, and Models	53
	A Case Study of an Asset-Liability Analysis for a Retiree	
	Medical Benefit Plan	56
	<i>Setting Objectives</i>	56
	Summary	64
	Appendix 3.1—Evaluating Models Available to Plan Sponsors	66
	Appendix 3.2—Additional Data for the Case Study	69
	Notes	73
Chapter 4	Optimal ALM Strategies	75
	<i>Arun S. Muralidhar and Ronald van der Wouden</i>	
	Overview	75
	A Case Study for a U.S.-Based Defined Benefit Pension Plan	77
	Methodology	81
	Results	86
	Extensions	95
	Summary	96
	Notes	98

Chapter 5	An Asset-Liability Analysis of the Currency Decision for Pension Plans	100
	<i>Arun S. Muralidhar, Ronald van der Wouden, and Robertus Prajogi</i>	
	Overview	100
	Asset-Liability Objectives and Risk Measures	102
	Implications for Asset Allocation and Passive Currency Hedging	104
	Implications for Active Currency Management Programs	112
	Caveats	116
	Summary	117
	Appendix 5.1—Application of Similar Techniques to Central Banks	119
	Notes	121
PART III		
RISK MANAGEMENT		
Chapter 6	A Framework for Using Derivatives	125
	<i>Arun S. Muralidhar</i>	
	Overview	125
	Transactions	126
	Goals and Corresponding Derivatives Strategies	127
	Summary	138
	Appendix 6.1—Using Derivatives to Establish Better Benchmarks	139
	Notes	150
Chapter 7	Asset-Liability Value at Risk	151
	<i>Arun S. Muralidhar and Kemal Asad-Syed</i>	
	Overview	151
	The Problem	152
	A Case Study in Asset-Liability VAR	154
	Alternative Definitions of Risk: Absolute Downside or Drawdown	157
	Alternative Methods to Measure Risk: The Effect of Non-Normality	158

	Areas of Additional Research	160
	Summary	160
	Notes	162
Chapter 8	Decomposing and Understanding Risk	163
	<i>Arun S. Muralidhar, Kemal Asad-Syed, and Paolo Pasquariello</i>	
	Overview	163
	Pension Plan Risks	165
	Definition of Terms	166
	A Case Study in Marginal Risk Analysis	168
	Usefulness of This Measure	170
	Comparison with Other Methodologies	171
	Caveats	174
	Summary	174
	Appendix 8.1—The Mathematical Solution for Marginal Contribution	176
	Appendix 8.2—The Intuitive Approach	178
	Appendix 8.3—Correlations of Asset Allocations to Portfolio Allocations	180
	Notes	182
PART IV	IMPLEMENTATION OF ASSET ALLOCATION	
Chapter 9	Performance Attribution and Risk-Adjusted Performance	185
	<i>Arun S. Muralidhar</i>	
	Overview	185
	Performance Attribution	186
	Luck versus Skill	190
	Risk-Adjusted Performance	192
	Summary	204
	Appendix 9.1—Attributing Performance to Currency Overlay and Long-Short Portfolios	206
	Appendix 9.2—The Luck or Skill Technique	208
	Appendix 9.3—Determining <i>a</i> and <i>b</i> in the CAP Equation	210
	Notes	212

Chapter 10	Fund Selection: The Importance of Skill	214
	<i>Arun S. Muralidhar and Shaila Muralidhar</i>	
	Overview	214
	The Problem	216
	The Solution	218
	Extensions	225
	Caveats	230
	Summary	231
	Notes	232
Chapter 11	Optimal Risk-Adjusted Portfolios With Multiple Managers	233
	<i>Arun S. Muralidhar</i>	
	Overview	233
	The Problem	234
	The Single-Manager versus The Multiple-Manager Approach	235
	Creating Optimal Portfolios Using the M^3 Measure	236
	Extensions	241
	Summary	241
	Appendix 11.1—Solution to Correlation of Portfolio of Multiple Funds with Benchmark	243
	Notes	244
Chapter 12	The Greater Fool Theory of Asset Management or Where a Fund Should Take Risk	245
	<i>Arun S. Muralidhar</i>	
	Overview	246
	Wilshire Database	247
	Analysis	249
	Extensions	257
	Summary	259
	The Plan Sponsor Database	260
	The Data	261
	Analysis	262
	Data on Other Countries	266

	Summary	266
	Appendix 12.1—Background Information for Chapter Analysis	269
	Notes	270
Chapter 13	Qualitative Aspects of Manager Selection <i>Arun S. Muralidhar</i>	272
	Overview	272
	Summary	279
	Note	280
PART V		
PEER COMPARISON		
Chapter 14	Establishing a Peer Comparator Universe for an Institutional Investor <i>Arun S. Muralidhar and Khin Mala U</i>	283
	Overview	283
	A New Approach	287
	Caveats and Extensions	296
	Summary	298
	Notes	300
	<i>References</i>	303
	<i>Author</i>	313
	<i>Index</i>	315

The following are coauthors of papers on which some of the chapters are based: Sudhir Krishnamurthi (Chapters 1, 2, and 3), Ronald van der Wouden (Chapters 2, 3, 4, and 5), Robertus Prajogi (Chapters 5 and 12), Masaki Tsumagari (Chapter 6), Kemal Asad-Syed (Chapters 7 and 8), Paolo Pasquariello (Chapter 8), Arturo Balana (Chapter 9), Robert Weary (Chapters 6, 9, and 12), Shaila Muralidhar (Chapter 10), and Khin Mala U (Chapter 14).

LIST OF FIGURES AND TABLES

Chapter 1	Figures	
1.1	Keys to Success	5
1.2	A Model for Organization Structure	6
1.3	Oversight Committee: Composition and Responsibilities	7
1.4	Investment Team: Composition and Responsibilities	9
1.5	The Pension Fund Balance Sheet	11
1.6	Pension Fund Objectives	11
1.7	Implementation of Investment Policy	17
1.8	Pension Fund Risks	19
1.9	Performance Attribution: A Simple Example	21
1.10	Implementation Issues for Each Manager and for the Entire Portfolio	22
A1.1.1	Objectives for Management of Central Bank Reserves	24
	Tables	
1.1	Objective Identification and Ranking by Oversight Committee	13
1.2	An Example of a Good Benchmark	16
Chapter 2	Figures	
2.1	Investment Characteristics of Defined Benefit and Defined Contribution Plans	31
2.2	The Investment Policy Process	34
2.3	Liabilities in DB and DC Plans	35
2.4	Objectives of Both DB and DC Plans	36

Chapter 3		Figures	
3.1	Investment Policy—The Traditional Approach		47
3.2	The Importance of Optimal Investment Policy: U.S. Pension Funds, 1980–1996		47
3.3	An Instrument to Establish Objectives		50
3.4	Establishing Forward-Looking Return Assumptions		54
		Tables	
3.1	Characteristics of the Economic Variables		57
3.2	Initial Allocation Across Asset Classes		58
3.3	Optimal Percentage Allocation to Equity for Funded Ratio Target of 105%		59
3.4	Optimal Percentage Allocation to Equity for Funded Ratio Target of 100%		59
3.5	Dynamic Asset Allocation Rule		61
3.6	Optimal Allocation Across Asset Classes for Given Levels of Equity		62
A3.1.1	Comparing Mean-Variance, Dynamic Simulation, and Optimization Models		67
A3.2.2	Correlations Between Asset Class Returns		69
A3.2.3	Optimal Percentage of Equity by Funded Ratio Target, Risk Tolerance, and Funding Policy		70
A3.2.4	Expected Average Return for Different Equity Levels by Funding Policy		71
A3.2.5	Expected Funded Ratio at the End of the Time Horizon (Year 2010)		71
A3.2.6	Expected Average Contribution Rate for Different Equity Levels by Funding Policy		71
A3.2.7	Expected Probability of Underperforming the Average U.S. Plan		72
Chapter 4		Figures	
4.1	Framework for Strategy Comparisons		85
4.2	The Efficient Frontier for ALM Static Asset Allocation		86
4.3	Comparing Static Derivatives Frontier with the Basic Frontier		87
4.4	The Dynamic Derivatives Strategy		88
4.5	The Dynamic Asset Allocation Strategy		90
4.6	Evaluating Static Policies with Leverage		91

4.7	Four Efficient Frontiers	92
4.8	Comparing All Strategies	93
	Tables	
4.1	Characteristics of the Economic Variables	79
4.2	Fixed and Floating Allocations	80
4.3	Initial Asset Allocations Under Various Strategies Assuming Downside Deviation of 2.0% If Funded Ratio Falls Below 100%	94
Chapter 5	Figures	
5.1	Framework for Analysis	103
5.2	Comparing Asset-Only to Asset-Liability Analyses	109
5.3	Investing More Than 30% Abroad Is Beneficial	110
5.4	Useful to Distinguish Between U.S. and Other Foreign Exposures	111
5.5	Active Management Is Beneficial	116
A5.1.1	Optimal Strategy Dynamic Hedge Ratios for a Central Bank	119
	Tables	
5.1	Objectives, Target Levels, Risk Measures, and Weaknesses	102
5.2	Expected Return, Risk, and Correlation Assumptions (Passive Management)	106
5.3	Information for Nine Portfolios (Passive Management)	108
5.4	Summary Results of Asset-Only and Asset-Liability Comparisons	112
5.5	Expected Return, Risk, and Correlation Assumptions (Active Management)	114
5.6	Asset Allocation with Active Management	115
Chapter 6	Figures	
6.1	Payoff Profile for Put-Call Spread and Components	128
6.2	Linking Objectives to Time Horizon and Investment Process	130
6.3	Optimal Use of Instruments Based on Objective and Time Horizon	131
6.4	Payoff Profile for Collar and Components	132

	Tables	
6.1	Matrix for Decisions for International Portfolios	136
A6.1.1	Performance of Synthetic Indices (January 1997 Through June 1998)	141
A6.1.2	Comparison of Non-U.S. Developed Market Benchmarks	142
A6.1.3	MSCI Country Indices Versus Local Indices	143
A6.1.4	Ratio of Futures Volume to Stock Volume (December 31, 1997)	144
A6.1.5	Characteristics of Fixed Income Indices	146
Chapter 7	Figures	
7.1	Measuring, Monitoring, and Managing Pension Fund Risks	154
7.2	The Value-at-Risk Tree	156
7.3	Return Distributions	159
7.4	Drawdown Distributions	159
Chapter 8	Tables	
8.1	Benchmark, Actual, and Relative Portfolios: Weighting of Assets	166
8.2	Contribution to the Standard Deviation of the Three Portfolios	168
8.3	Percentage Contribution to the Standard Deviation of the Three Portfolios	169
8.4	Implied Correlation of Asset Class Bet to Portfolio of Bets	169
8.5	Comparing Methods of Estimating Contribution to Benchmark Risk Percentage	172
8.6	Comparing Methods of Estimating Contribution to Relative Risk Percentage	172
A8.3.1	Data on Asset Classes	181
Chapter 9	Figures	
9.1	Traditional Performance Attribution Methodologies	187
9.2	Proposed Performance Attribution Methodology	188
9.3	Hypothetical Total Fund Performance Attribution	190
9.4	An Evaluation of the M^2 Measure	193
9.5	Comparing Annualized Absolute Outperformance (Versus S&P 500) and Confidence That Outperformance Is from Skill (Data from August 1989–1999)	201

xvii LIST OF FIGURES AND TABLES

9.6	Comparing Annualized Information Ratios (Versus S&P 500) and Confidence That Outperformance Is from Skill (Data from August 1989–1999)	202
9.7	Comparing Annualized Risk-Adjusted Excess Returns (Versus S&P 500) and Confidence That Outperformance Is from Skill (Data from August 1989–1999)	203
	Tables	
9.1	Performance of Mutual Funds Assuming a 3% Target Tracking Error	198
9.2	Performance of Mutual Funds Assuming a 7% Target Tracking Error	199
9.3	Ranking Funds Using Different Methods	200
A9.1.1	Example of Fund with Overlay Account	207
Chapter 10	Tables	
10.1	Proposed Grading Scheme for the Simplest Case	219
10.2	Data for U.S. Equity Mutual Funds over Different Time Horizons	221
10.3	FirstRate Ratings for Different Time Horizons and Objectives	222
10.4a	FirstRate Rankings First by Absolute Returns and Then by Confidence in Skill	223
10.4b	FirstRate Rankings First by Confidence in Skill and Then by Absolute Returns	223
10.5a	FirstRate Scores First by M^3 Risk-Adjusted Returns and Then by Confidence in Skill (M^3 Returns)	225
10.5b	FirstRate Ratings First by Confidence in Skill (M^3 Returns) and Then by M^3 Risk-Adjusted Returns	226
10.6	FirstRate Ratings for Multiple-Fund Portfolios Combining 1/3 of the Fund with 1/3 Each of Funds 5 and 10	227
Chapter 11	Tables	
11.1	Performance of Investment Managers Assuming 7% Target for Tracking Error	237
11.2	Correlations Between Seven Managers', Benchmark, and Risk-Free Portfolios	238
11.3	Ranking Managers Using Absolute Returns and M^3	238

11.4	Allocation to Investment Managers Under Different Optimization Scenarios	239
Chapter 12	Figures	
12.1	Tracking Error Versus Excess Returns in All Asset Classes	247
12.2	Large-Cap U.S. Equity Managers	250
12.3	Mid-Cap U.S. Equity Managers	251
12.4	Small-Cap U.S. Equity Managers	252
12.5	Non-U.S. Equity Managers	253
12.6	Non-U.S. Equity Managers Versus Japan-Lite	253
12.7	Emerging Markets Equity Managers	254
12.8	U.S. Fixed Income Managers	255
12.9	Non-U.S. Fixed Income Managers	256
12.10	Non-U.S. Fixed Income Managers Versus Japan-Lite Index	256
12.11	High-Yield Bonds Managers	257
12.12	U.S. Fixed Income—Information Ratio Versus Tracking Error	258
12.13	U.S. Equity Mid-Cap—Information Ratio Versus Tracking Error	259
12.14	Confidence in Skill Versus Excess Returns in Different Asset Classes	264
	Tables	
12.1	Details on Asset Classes in the Wilshire Database	248
12.2	The Plan Sponsor Network Database (Through December 2000)	261
12.3	Details on Asset Classes—Plan Sponsor Network Database	263
12.4	Performance of UK Pension Funds (1986–1994)	266
A12.1.1	Additional Details on Wilshire Database	269
A12.1.2	Excess Returns, Tracking Error, and Information Ratios— Wilshire Database	269
Chapter 13	Figures	
13.1	Process for Manager Selection	273
13.2	Issues Pertaining to the Organization	275
13.3	Issues Pertaining to Investment Process	276
13.4	Implementation Issues	278

Chapter 14	Figure	
14.1	Expected Performance and Risk of Benchmarks for Different Funds	291
	Tables	
14.1	An Example of Current Peer Comparison and Ranking	286
14.2	Data on Asset Classes for Peer Comparison	289
14.3	Benchmark Composition for Different Funds	290
14.4	Comparing the IBRD to an International Plan (INT1): Confidence Estimates Based on Correlation, for Different Periods	292
14.5	Comparing the IBRD to an Endowment Fund (END1): Confidence Estimates Based on Correlation, for Different Periods	293
14.6	Comparing the IBRD to a Corporate Fund (COR1): Confidence Estimates Based on Correlation, for Different Periods	294
14.7	Comparison of Simulated Tracking Error for Permissible Ranges	295
14.8	Comparing Excess Returns for the IBRD and a Corporate Fund: Confidence Estimates Based on Correlation, for Different Periods	296
14.9	Comparing Excess Returns for the IBRD and an Endowment Fund: Confidence Estimates Based on Correlation, for Different Periods	297
14.10	Comparing Excess Returns for the IBRD and an International Plan: Confidence Estimates Based on Correlation, for Different Periods	298
