

TABLE 7.1 Two methods to estimate the standard deviation of b

<i>Sample size</i>	<i>True standard deviation of b, based on equation (5.50)</i>	<i>Sample standard deviation of 50 slope estimates, from table 5.4</i>	<i>Estimated standard deviation of slope, from equation (7.5)</i>
100	857.49	879.73	830.27
1,000	271.16	299.71	276.94
10,000	85.749	79.271	86.957
100,000	27.116	29.899	27.483
